Technical data

Key technologies

Intelligent Pre Brew Aroma System (I.P.B.A.S.®)	■
Two cups in a single brewing operation	■
CLARIS filter cartridge (I.P.W.S.® compatible)	■
Variable brewing unit	5 – 16 g
Powerful 6-level conical grinder	■
High-performance pump, 15 bar	■
Thermoblock heating system	■
Additional pre-ground coffee powder	■
Integrated rinsing / cleaning / descaling programme	■
Adjustable water hardness	■
Automatic recognition of filter change	■
Automatic recognition of maintenance programmes	■
Automatic recognition to fill beans	■
Power Switch	■

Key features

Coffee grounds container (portions)	approx. 16
Connector System®	■
Professional Cappuccino Frother	accessory
Easy Cappuccino Frother	■
2-stage frothing nozzle	accessory
Separate hot water frother	■
Rotary Switch	■
Clear text display	■
Height-adjustable coffee spout	65 – 111 mm
Adjustable coffee strength	3 strengths
Adjustable amount of water	■
Integrated Cappuccino rinsing programme	■
Integrated Cappuccino cleaning programme	■
Steam and hot water function	■
Energy Save Mode (E.S.M.®)	■
Cappuccino at the touch of a button, without moving cup	■
Dispensing height of Cappuccino frother	110 mm
Counter for cups dispensed	■
Indication of care status	■
Information menu	■
Stainless steel vacuum milk container	0.4 l
Cup tray	■

Programming

Programmable switch-on time	■
Programmable switch-off time	■
Programmable coffee strength	■
Programmable water quantity for coffee	■
Programmable hot water and steam portions	■
Programmable brewing temperature	2 strengths

Facts

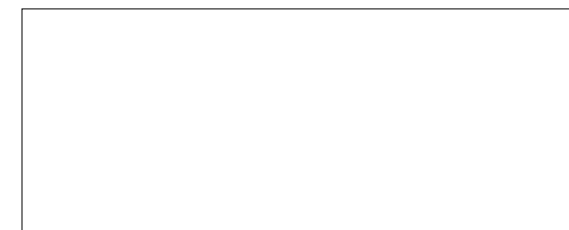

Water tank capacity	1.9 l
Bean container with aroma preservation cover	200 g
Cable length	app. 1.1 m
Voltage	220 – 240 V AC
Power	1450 W
Intensity of current	6.6 – 6.0 A
Weight	9.6 kg
Dimensions (W x H x D)	28 x 34.5 x 43.4 cm

IMPRESSA
IF YOU LOVE COFFEE

IMPRESSA C9 – One Touch

Ultimate enjoyment at the touch of a button

Cappuccino at the touch of a button

Energy Save Mode (ESM®)

Maximum performance, minimum space

Coffee specialities made with milk or milk froth are top of the popularity stakes. But lack of space has prevented many coffee lovers from being able to make perfect cappuccinos or delicious lattes in the comfort of their own homes. And it was precisely with connoisseurs like them in mind that JURA developed the new IMPRESSA C9. With its Professional Cappuccino Frother, it whistles up fabulous coffee at the touch of a button – with no need to move the cup.

Precisely to your taste

Enjoyment is as individual as you are. Which is why the IMPRESSA C9 leaves the choice of coffee beans entirely up to you. A wealth of setting and programming options guarantee a coffee experience entirely to your liking, because ultimately it's all down to your good taste.

Keeping things clean

Whenever you're using milk, absolute hygiene is critical. And to prevent the formation of residues that might adversely affect the flavour or consistency of your coffee, the IMPRESSA C9 features an automatic cappuccino rinsing system as well as a cappuccino cleaning program. Combined with a range of special JURA maintenance products, this gives you guaranteed cleanliness, all at the touch of a button.

Simple and intuitive in operation

With its clear text display, readily understandable symbols and Rotary Switch, the IMPRESSA C9 couldn't be easier to operate. Simply by turning and pressing the switch, you navigate your way through the programming options while the display provides clear text feedback. Which means you get where you want to go, quickly and directly.

Ecologically sensitive

To ensure that precious resources are not wasted, the IMPRESSA C9 features the JURA Energy Save Mode (E.S.M.®). This keeps power consumption low if the machine is not used for any length of time. Automatic switch-off at any time between half an hour and five hours after the last coffee has been made can be simply programmed, and the mains switch can be used to interrupt the power supply so that no standby energy is used. The environment – and your wallet – will be grateful.

Cool milk all day long

One of the standard features of the compact bean-to-cup speciality coffee machine is an insulated stainless steel container holding 0.4 l / 14 oz of milk. Its design harmonizes perfectly with the clean lines of the IMPRESSA. It keeps milk chilled the whole day long and saves you constant trips to the refrigerator. And that has to be cool.
